Consultation initiated by the European Commission to add sites

19. (1) If consultation is initiated by the European Commission in accordance with Article 5(1) of the Habitats Directive with respect to a site hosting a priority natural habitat type or priority species, and the Minister agrees that the site should be added to the list transmitted in accordance with *Regulation 13(5)*, the site shall be treated as added to the list as from the date of that agreement or decision, and the Minister shall, having compiled the information required pursuant to *Regulation 11*, initiate the designation process pursuant to *Regulation 12*.

(2) Where a decision is made by the Council that a site should be included in the list pursuant to Article 5(3) of the Habitats Directive, the Minister shall immediately designate the site, and notify those bodies and persons referred to in *Regulations 14(2)* and *14(3)* of said decision, and inform them that there is no right of appeal or to request a review in such circumstances.

Multiple status

22. For the avoidance of doubt, land within a candidate site of Community importance or a site of Community importance or a special area of conservation may at the same time be within a candidate special protection area or a special protection area and vice versa, and land within any such site may at the same time be in another site of the same kind.

Erection of notices

23. (1) The Minister may cause to be erected and maintained at suitable places within, or on the boundary of, or near any European Site or other specified land referred to in *Regulation 28(1)* or *29(1)* or any other suitable place as he or she deems appropriate for the purposes of the Habitats Directive, the Birds Directive or these Regulations, a notice giving information and guidance on any or all of the following—

 - (ii) their function as stepping stones, such as ponds or small woods,

are essential for the migration, dispersal and genetic exchange of wild species, for the purposes of the Habitats Directive or the Birds Directive, or with any public authority that manages or controls such land or that exercises functions in relation to such land, or that manages, controls or exercises functions in relation to habitats and species, for the management, conservation, restoration or protection of that land or of any part of it or of the habitats or species therein, for the purposes of the Habitats Directive or the Birds Directive or these Regulations.

(4) The Minister may enter into a management agreement or administrative agreement with any owner, lessee or occupier of land or with any public authority that manages or controls such land or that exercises functions in relation to such land, or jointly with any such person or persons or any public authority or authorities—

(9) For the avoidance of doubt—

- (a) A management agreement within the meaning of this Regulation is not limited to being a bilateral agreement.
- (b) A management agreement within the meaning of this Regulation may, where necessary, be amended or terminated, on provision of reasonable notice, in the light of the status and conservation objectives of the site.

(3) For the purposes of *paragraph (1)*, an owner disposes of an interest in land if he or she disposes of it by way of sale, exchange or lease or by way of the creation of any easement, right or privilege, or in any other way except by way of mortgage.

PART 4

ACTIVITIES, PLANS OR PROJECTS AFFECTING EUROPEAN SITES

Conservation objectives and measures to be undertaken by the Minister

26. (1) The Minister shall exercise his or her functions relating to nature conservation so as to secure compliance with the requirements of the Habitats Directive and the Birds Directive.

(2) The Minister shall establish such particular conservation objectives as he or she, from time to time, considers necessary to achieve the maintenance of the habitat types or species in respect of which a site has been identified as a European Site at favourable conservation status or their restoration to such favourable status.

(3) The Minister may, where he or she considers it would contribute to the achievement of the objective of Article 3(1) of the Habitats Directive, namely to enable the natural habitat types listed in Annex I to that Directive and the habitats of the species listed in Annex II to that Directive to be maintained at or, where appropriate, restored to a favourable conservation status in their natural range, establish the conservation or restoration of such a habitat type or the habitat of such a species as a conservation objective of a site.

(4) The Minister shall, having established conservation objectives under *paragraph (2)* or *(3)* or identified under *subparagraph (7)(b)* one or more additional bird species for inclusion in the conservation objectives of the site, notify the bodies and persons referred to in *Regulations 16(6)* and *16(7)* providing those bodies and persons, within a reasonable period, with a statement of the updated conservation objectives of the site concerned, and shall publish them on the Department's website.

- (c) establish in relation to special protection areas the administrative or contractual measures which he or she considers correspond to the ecological requirements of the species in Annex I to the Birds Directive and of the regularly occurring migratory species not in Annex I to the Birds Directive present on the sites.

(8) In relation to the exercise of his or her functions under this Regulation, the Minister may consult with such persons as he or she considers appropriate.

Duties of public authorities relating to nature conservation

27. (1) Without prejudice to the Minister's responsibilities under the Birds Directive, the Habitats Directive and these Regulations for the effective implementation of those Directives, or to the application of *Regulation 42* to the plans and projects of public authorities where, by enactment, such responsibilities have been assigned to another Minister of Government or to another public authority, or where such responsibilities arise in the exercise of any of their statutory powers and functions, those responsibilities shall, to the extent that they have been so assigned or so arise, be carried out by the Minister of Government or other public authority concerned, and the Minister shall not undertake such responsibilities.

(4) Public authorities, in the exercise of their functions, insofar as the requirements of the Birds Directive and the Habitats Directive are relevant to those functions, shall—

- (a) take the appropriate steps to avoid, in candidate special protection areas, pollution and deterioration of habitats and any disturbances affecting the birds insofar as these would be significant in relation to the objectives of Article 4 of the Birds Directive,
- (b) outside those areas, strive to avoid pollution or deterioration of habitats, and
- (c) take appropriate enforcement action.

(5) Without prejudice to *paragraphs (2), (3) and (4)*, every public authority in the exercise of any of its functions or responsibilities, shall—

- (a) comply with the requirements of the Habitats Directive, the Birds Directive and these Regulations insofar as they may arise for consideration in the exercise of those functions,

the Minister shall, where he or she considers appropriate, direct that, subject to *paragraph (2)*, the activity shall not be carried out, caused or permitted to be carried out or continued to be carried out by any person in the European Site or part thereof or at any other specified land except with, and in accordance with, consent given by the Minister under *Regulation 30*.

- (b) it would require environmental impact assessment under the EIA Directive by reason of its likely effect on a European Site or on a Natural Heritage Area,
- (c) it would be likely, individually or in combination with other plans or projects, to have a significant effect on a European Site or on a Natural Heritage Area, or

Restoration of land in a European Site following damage

36. (1) Where an activity, plan or project that has been carried out within or outside a European Site, has caused damage to that site or to species or habitat types for which the site was selected as a European Site, and—

- (c) it is in contravention of any of the terms or conditions of a consent referred to in *subparagraph (a) or (b)*, or
- (d) it is otherwise unlawful,

the Minister may, by Direction issued in writing, require the owner, occupier or user of the land or the person who carried out the activity, plan or project, or such of those persons as he or she considers appropriate, to restore the land in accordance with the Direction.

(2) Where an activity, plan or project referred to in *paragraph (1)* has been carried out, and has resulted in the production of mineral or other resources, including but not limited to soil, gravel, timber or the product of turf-cutting or peat extraction, any person who removes, or places in or on a vehicle for removal, any such resources, save in accordance with *paragraph (5)*, shall be guilty of an offence.

- (3) (a) Every Direction referred to in *paragraph (1)* shall specify the restoration works to be undertaken and the period within which the works specified are to be completed.
- (b) Any person who fails to comply with a Direction under *paragraph (1)* shall be guilty of an offence.

(4) If, within the period specified in a Direction or within such extended period as the Minister may allow having regard to the nature of the restoration works to be carried out, any steps required by the Direction to be taken have not been taken, the Minister may take such action as he or she considers necessary, including authorising a person or persons to access and enter on the land to take those steps, together with such other persons under his or her direction, vehicles, equipment and materials as may be appropriate for that purpose, and the Minister may recover any expenses reasonably incurred by him or her in

that behalf as a simple contract debt, in any court of competent jurisdiction, from the person or persons to whom the Direction was made.

(5) (a) Where the Minister forms the view that the restoration of a site would be best achieved following the removal from the site of any resource to which *paragraph (2)* applies,

(i) he or she may remove or cause to be removed any such resource, including authorising a person or persons to access and enter on the land for that purpose, together with such other persons under his or her direction, vehicles, equipment and materials as may be appropriate for that purpose,

(ii) the Minister may cause the resource to be stored or retained in a place specified by him or by her, and

(iii) the Minister may dispose of or cause to be disposed of any such resource and, if that resource is, in his or her opinion, capable of being sold, the Minister shall be entitled to sell or cause to be sold that resource for the best price reasonably obtainable.

(a) that an activity, plan or project that has been carried out within or outside a European Site pursuant to a consent has caused damage to that site or to species or habitat types for which the site was selected as a European Site, and

(b) that such consent was obtained by a person or persons knowingly supplying false information or knowingly failing to divulge information or data that could be relevant to the determination by a public authority of whether, pursuant to Article 6(3) of the Habitats Directive, it could agree to the plan or project, having ascertained

that the plan or project, individually or in combination with other plans or projects, would not have a significant effect on, or adversely affect the integrity of, a European Site,

the Minister may make application to a court of competent jurisdiction for a restoration warrant, and the court, having investigated the matter, may give the Minister a restoration warrant, and, if it does so, it may also give an order quashing the consent referred to in *subparagraph (b)*.

(9) A restoration warrant given by a court on foot of an application by the Minister under *paragraph (8)*, shall specify that the Minister may, by Direction issued in writing, and accompanied by the order of the court, require the owner, occupier or user of the land or the person who carried out the activity, plan or project, or such of those persons as the court considers appropriate, to restore the land in accordance with the Direction, and *paragraphs (3), (4), (5), (6) and (7)* shall apply in relation to that Direction.

(10) Before deciding to issue a Direction under *paragraph (1)* or to seek a restoration warrant under *paragraph (8)*, the Minister shall consult with the Environmental Protection Agency regarding liabilities that may arise under the Environmental Liability Directive.

(2) A public authority shall carry out a screening for Appropriate Assessment under *paragraph (1)* before consent for a plan or project is given, or a decision to undertake or adopt a plan or project is taken.

(3) At any time following an application for consent for a plan or project, a public authority may give a notice in writing to the applicant, directing him or her to—

(5) (a) A Natura Impact Statement shall, in addition to addressing the issues referred to in the interpretation contained in *Regulation 2(1)*, include such information or data as the public authority considers necessary, and specifies in a notice given under *paragraph (3)*, to enable it to ascertain if the plan or project will affect the integrity of the site.

(b) Where appropriate, a Natura Impact Statement shall include, in addition—

(i) the alternative solutions that have been considered and the reasons why they have not been adopted,

(ii) the imperative reasons of overriding public interest that are being relied upon to indicate that the plan or project should proceed notwithstanding that it may adversely affect the integrity of a European site,

(iii) the compensatory measures that are being proposed.

(6) The public authority shall determine that an Appropriate Assessment of a plan or project is required where the plan or project is not directly connected with or necessary to the management of the site as a European Site and if it cannot be excluded, on the basis of objective scientific information following screening under this Regulation, that the plan or project, individually or in combination with other plans or projects, will have a significant effect on a European site.

(7) The public authority shall determine that an Appropriate Assessment of a plan or project is not required where the plan or project is not directly connected with or necessary to the management of the site as a European Site and if it can be excluded on the basis of objective scientific information following screening under this Regulation, that the plan or project, individually or in combination with other plans or projects, will have a significant effect on a European site.

(8) (a) Where, in relation to a plan or project for which an application for consent has been received, a public authority makes a determination that an Appropriate Assessment is required, the public authority shall give notice of the determination, including reasons for the determination of the public authority, to the following—

(i) the applicant,

(ii) if appropriate, any person who made submissions or observations in relation to the application to the public authority, or

(10) A public authority that has, pursuant to *paragraph (9)*, prepared a Natura Impact Statement, shall not, without the agreement of the Minister, conclude an Appropriate Assessment of the plan or project to which that statement relates earlier than six weeks after the date on which it submitted the Natura Impact Statement to the Minister, and shall take account of any submissions made to it by the Minister.

(11) An Appropriate Assessment carried out under this Regulation shall include a determination by the public authority under this Regulation pursuant to Article 6(3) of the Habitats Directive as to whether or not a plan or project would adversely affect the integrity of a European site and the assessment shall be carried out by the public authority before a decision is taken to approve, undertake or adopt a plan or project, as the case may be.

(12) In carrying out an Appropriate Assessment under *paragraph (11)* the public authority shall take into account each of the following matters—

(14) Where a public authority is required to make a decision in relation to giving any consent for a plan or project within a time limited by any enactment, that time period shall not, in a case in which a requirement is made by the public authority under *paragraph (4)*, include the period beginning on the day the requirement is made and ending eight weeks after the day of receipt by the public authority concerned of the requested further information or evidence.

(15) For the avoidance of doubt, notwithstanding subsection (10) of section 85 of the Environmental Protection Agency Act 1992, the appropriate period referred to in that subsection shall not, in a case in which a request is made by the Environmental Protection Agency under *paragraph (3)*, include the period beginning on the day such requirement is made and ending eight weeks after the day of receipt by the Environmental Protection Agency of the requested further information or evidence.

(16) Notwithstanding any other provision of these Regulations, a public authority shall give consent for a plan or project, or undertake or adopt a plan or project, only after having determined that the plan or project shall not adversely affect the integrity of a European site.

(17) Subject to any other provision of these Regulations—

- (a) Consent for a plan or project may be given where a public authority has made modifications to a plan or project or attached conditions to the consent where the authority is satisfied to do so having determined that the a plan or project would not adversely affect the integrity of the European site if it is carried out in accordance with the consent and the said modifications or conditions attaching thereto.
- (b) A public authority shall not adopt or undertake, or grant any consent for, a plan or project containing any conditions, restrictions or requirements purporting to—

 - (iii) permit or facilitate the avoidance of compliance with the conditions set out in Article 6(4) of the Habitats Directive.
- (18) (a) A public authority shall make available for inspection any determination that it makes in relation to a plan or project and provide reasons for that determination, as soon as may be after the making of the determination or giving the notice, as appropriate, by members of the public during office hours of the offices of the authority and shall also make the determination or notice available in electronic form including by placing the documents on the authority's website.
- (b) Information that is identified by a person applying for consent for a plan or project as being of a commercially sensitive nature shall, provided and for so long as it could be withheld under European Directive 2003/4/EC on public access to environmental information be exempted by the public authority from the requirements of *subparagraph (a)*.
- (c) Information that if made publicly available could pose a risk to the conservation of protected species or habitats may be exempted from the requirements of *subparagraph (a)*.

- (20) For the avoidance of doubt, notwithstanding the fact that the making, adoption and consent procedures relating to plans and projects which fall under the Planning and Development Acts 2000 to 2011 do not come within the scope of these Regulations, a public authority shall, pursuant to Article 6(3) of the Habitats Directive, take cognisance of such plans and projects in assessing any effects that might arise when such plans or projects are considered in combination with any activities, plans or projects for which the public authority is undertaking screening for Appropriate Assessment or Appropriate Assessment.
- (21) (a) Where a public authority, referred to in this paragraph as "the first authority", has carried out a screening for Appropriate Assessment or an Appropriate Assessment in relation to a plan or project, any other public authority, referred to in this Regulation as "the second authority", that is required to carry out a screening for Appropriate Assessment or an Appropriate Assessment of the same plan or project shall take account of the screening for Appropriate Assessment

or Appropriate Assessment of the first authority in relation to that plan or project, and of any information, including a Natura Impact Statement that was prepared for consideration by the first authority or another second authority in relation to the plan or project.

- (b) In taking account of a screening for Appropriate Assessment or Appropriate Assessment in relation to a plan or project and of a Natura Impact Statement, the second authority shall consider the extent to which the scope of that screening for Appropriate Assessment or Appropriate Assessment or Natura Impact Statement covers the issues that would be required to be addressed by the second authority in a screening for Appropriate Assessment or Appropriate Assessment of the plan or project in view of the scope of the consent to be given by it, and shall identify any issues that have not, in that regard, been adequately addressed.
- (c) Subject to *subparagraph (b)* and without prejudice to its right to request all such information as it considers necessary to carry out a screening for Appropriate Assessment or Appropriate Assessment, the second authority may limit its requirement for information, including a Natura Impact Statement, to those issues that it determines have not been adequately addressed for the purposes of the second authority in the process of screening for Appropriate Assessment and Appropriate Assessment by the first authority or by another second authority.
- (d) Where a plan or project requires two or more consents, each of which would require screening for Appropriate Assessment or Appropriate Assessment, the public authorities may carry out, following joint consultation, a joint screening for Appropriate Assessment or a joint Appropriate Assessment.
- (e) Where two or more public authorities propose to carry out a joint screening for Appropriate Assessment or a joint Appropriate Assessment pursuant to *subparagraph (d)*, the public authorities concerned shall so inform the proponent of the plan or project and provide him or her with a single contact address for correspondence, and they may agree that one public authority shall, in consultation with the others, lead the process and or co-ordinate correspondence with the proponent.

(22) Notwithstanding any provision of any statute listed in the *Second Schedule* that provides for the consent for a plan or project to which this Regulation applies to be obtained by default on the failure of the public authority to provide

a response within a specified timescale or otherwise, that provision shall not have effect in respect of any plan or project to which this Regulation applies.

(23) For the avoidance of doubt, a plan or project referred to in this Regulation includes a plan or project that is within, partially within or outside a European Site.

(24) For the avoidance of doubt, in relation to a plan or project that is likely to affect more than one European Site or an area that is within more than one European Site, the screening for Appropriate Assessment and Appropriate Assessment shall address the impact of the plan or project, individually or in combination with other plans and projects, on each of the sites likely to be affected.

Proposed plans or projects and imperative reasons of overriding public interest

43. (1) Where, notwithstanding a determination by a public authority that a plan or project or part thereof will adversely affect a European Site, and in the absence of alternative solutions, a public authority considers that the plan or project should nevertheless be made for imperative reasons of overriding public interest, the authority shall—

- (a) set out the imperative reasons of overriding public interest that necessitate the carrying out of the plan or project,
- (b) propose the compensatory measures that are necessary to ensure that the overall coherence of the Natura 2000 network is protected,
- (c) prepare a statement of case that imperative reasons of overriding public interest exist and of the compensatory measures that are required, and
