EXPLANATORY NOTE

(This note is not part of the Regulations and does not purport to be a legal interpretation)

The new EU Regulation is ambitious and builds on the existing regulation whereby it aims to gradually over time phase down high global warming potential (GWP) fluorinated greenhouse (F-gases) and replace them with more environmentally friendly alternatives. Some key provisions include:-

- Extended containment provisions including recording leak checks
- Service and maintenance ban using high GWP refrigerants
- Extended placing on the market bans (Annex III)
- Phasing down the amount of F-gases that can be placed on the market through gradually reducing quotas given to F-gas producers and importers

The EU regulation which came into force on the 1st January, 2015 is immediately applicable in Ireland but revised national legislation is needed to enforce the requirements based on the extended scope of the new EU regulation.

The main provisions of these Regulations are:-

All undertakings must comply with these Regulations and Regulation 517/2014 (Regulation 5).

To provide for the designation of a number of competent bodies to administer specific provisions of Regulation (EU) No. 517/2014 in Ireland (Regulation 7).

To provide for various responsibilities of competent bodies designated for the purpose of giving effect to Regulation (EU) No. 517/2014 (Regulation 8).

To designate and assign duties to the EPA as competent authority (Regulation 9).

To provide for the appointment of, and assignment of the duties of, and various functions of, an Authorised Officer (Regulation 10).

To outline a number of offences under these Regulations (Regulation 13) and to make provision for the introduction of certain fixed payment notices for the following offences:

- Carrying out certain activities without the required certification
- Employing uncertified persons to carry out activities requiring certification
- Collecting or transporting gases without holding the appropriate permits
Failing to establish records of waste gas movements

Failing to conduct leak checks as required

Failure to maintain required records of leak checks

Placing fluorinated greenhouse gases on the market without the required labels

Placing equipment charged with fluorinated greenhouse gases on the market without declaration of conformity

Selling fluorinated greenhouse gases to an undertaking for the purposes of carrying out the installation, servicing, maintenance or repair of equipment that contains fluorinated greenhouse gases or whose functioning relies upon those gases who do not hold the relevant certificates or attestations

Buying fluorinated greenhouse gases for the purposes of carrying out the installation, servicing, maintenance or repair of equipment that contains fluorinated greenhouse gases or whose functioning relies upon those gases without holding the relevant certificates or attestations. To outline prosecutions and penalties (Regulation 14).
