EXPLANATORY NOTE

(This note is not part of the Instrument and does not purport to be a legal interpretation)

The purpose of these amending Regulations is to give further effect to the implementation of Directive 2009/125/EC of the European Parliament and of the Council of 21 October 2009 establishing a framework for the setting of eco-design requirements for energy-related products (recast).

The Energy-related Products Directive is a Framework Directive which specifies the framework within which detailed measures (referred to as EU measures) setting EU ecodesign requirements for specific energy-related products (referred to as listed products) are brought forward by the EU Commission. It is a recast of an earlier Directive (Directive 2005/32/EC) which established a framework for the setting of ecodesign requirements for energy using products and extends the scope of the application of that Directive to a wider variety of products which do not consume energy during use but have a significant contribution to make to energy saving

These Regulations amend the EU (Ecodesign Requirements for Certain Energy-related Products) (Amendment) Regulations 2013 (S.I. No. 454 of 2013). The amended Schedule sets out the expanded list of products and associated EU measures which are transposed by these Regulations.

The Regulations oblige manufacturers, their authorised representatives or, in their absence, an importer of a product listed in the Schedule, not to place the said product on the market or put it into service if it does not conform to the applicable EU measure.
