- (a) cannot reasonably be considered as creating a risk of damage to monuments to which special protection applies, or

CHAPTER 3

*Finding of archaeological objects***Requirement to report finding of archaeological object**

- 101.** (1) This section applies to an archaeological object other than an archaeological object which has been the subject of a preliminary report under *subsection (2)(b)* given to the Board or a member of An Garda Síochána.

- (c) Different periods may be prescribed for making a preliminary report of the finding of a thing under this section by reference to—

- (4) (a) Subject to *subsection (7)*, where a person makes a preliminary report under *subsection (2)* to the Board or a member of An Garda Síochána, the Board shall cause the person to be given, subject to *subsections (5) and (9)*, a return in the specified form.
- (b) A person who is given a return referred to in *paragraph (a)* shall complete it and return it, to the person specified in the return for the purpose, before the expiration of 7 days from the day on which he or she was given the return.

- (5) Without prejudice to the generality of *section 223*, a return referred to in *subsection (4)(a)* required to be completed by a person shall require the person to specify the following in the return:

- (8) It may be specified as a condition of a licence that this section shall apply to the finding of a thing occurring in the course of the activities authorised under the licence, whether generally or in such cases or circumstances as may be specified.
- (9) *Subsection (4)(a)* shall not place the Board under any obligation to cause a return referred to in that subsection to be given to a person where the Board is of the opinion that—

 - (iii) is trivial or vexatious,or
 - (b) it is otherwise unnecessary that such return be completed in respect of that report.
- (10) *Subsection (6)* shall not place the Board under any obligation to cause a thing the subject of a return referred to in *subsection (4)(a)*, or the site of the thing, to be inspected if the Board is of the opinion that—

 - (e) the return is trivial or vexatious.
- (11) Nothing in this section shall be construed to prejudice the generality of *section 190*.

- (2) The Board may, where it is of the opinion that a relevant archaeological object is not, or has ceased to be, of sufficient archaeological, historic, cultural or scientific interest to merit the protection afforded by *subsection (1)*, by notice published in *Iris Oifigiúil* specify that that subsection shall cease to apply to that object from the date, or the occurrence of the event, specified in the notice for the purpose and, accordingly, that subsection shall cease to apply to that object from that date or the occurrence of that event, as the case may be.

 - (b) given the licensee a reasonable opportunity, in the circumstances concerned, to make representations in writing to the authority on what is stated in the notice first-mentioned in *paragraph (a)*.
- (5) The licensing authority need not comply with *subsection (4)* in the case of the suspension of a licence if—

SCHEDULE 3

*Section 90*UNESCO CONVENTION CONCERNING PROTECTION OF THE WORLD CULTURAL AND NATURAL HERITAGE DONE
IN PARIS ON 23 NOVEMBER 1972

The General Conference of the United Nations Educational, Scientific and Cultural Organization meeting in Paris from 17 October to 21 November 1972, at its seventeenth session,

Noting that the cultural heritage and the natural heritage are increasingly threatened with destruction not only by the traditional causes of decay, but also by changing social and economic conditions which aggravate the situation with even more formidable phenomena of damage or destruction,

Considering that deterioration or disappearance of any item of the cultural or natural heritage constitutes a harmful impoverishment of the heritage of all the nations of the world,

Considering that protection of this heritage at the national level often remains incomplete because of the scale of the resources which it requires and of the insufficient economic, scientific, and technological resources of the country where the property to be protected is situated,

Recalling that the Constitution of the Organization provides that it will maintain, increase, and diffuse knowledge by assuring the conservation and protection of the world's heritage, and recommending to the nations concerned the necessary international conventions,

Considering that the existing international conventions, recommendations and resolutions concerning cultural and natural property demonstrate the importance, for all the peoples of the world, of safeguarding this unique and irreplaceable property, to whatever people it may belong,

Considering that parts of the cultural or natural heritage are of outstanding interest and therefore need to be preserved as part of the world heritage of mankind as a whole,

Considering that, in view of the magnitude and gravity of the new dangers threatening them, it is incumbent on the international community as a whole to participate in the protection of the cultural and natural heritage of outstanding universal value, by the granting of collective assistance which, although not taking the place of action by the State concerned, will serve as an efficient complement thereto,

Considering that it is essential for this purpose to adopt new provisions in the form of a convention establishing an effective system of collective protection of the cultural and natural heritage of outstanding universal value, organized on a permanent basis and in accordance with modern scientific methods,

Having decided, at its sixteenth session, that this question should be made the subject of an international convention,

Adopts this sixteenth day of November 1972 this Convention.

I. DEFINITION OF THE CULTURAL AND NATURAL HERITAGE***Article 1***

For the purpose of this Convention, the following shall be considered as “cultural heritage”:

monuments: architectural works, works of monumental sculpture and painting, elements or structures of an archaeological nature, inscriptions, cave dwellings and combinations of features, which are of outstanding universal value from the point of view of history, art or science;

groups of buildings: groups of separate or connected buildings which, because of their architecture, their homogeneity or their place in the landscape, are of outstanding universal value from the point of view of history, art or science;

sites: works of man or the combined works of nature and man, and areas including archaeological sites which are of outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view.

Article 2

For the purposes of this Convention, the following shall be considered as “natural heritage”:

natural features consisting of physical and biological formations or groups of such formations, which are of outstanding universal value from the aesthetic or scientific point of view;

geological and physiographical formations and precisely delineated areas which constitute the habitat of threatened species of animals and plants of outstanding universal value from the point of view of science or conservation;

natural sites or precisely delineated natural areas of outstanding universal value from the point of view of science, conservation or natural beauty.

Article 3

It is for each State Party to this Convention to identify and delineate the different properties situated on its territory mentioned in Articles 1 and 2 above.

**II. NATIONAL PROTECTION AND INTERNATIONAL PROTECTION OF THE
CULTURAL AND NATURAL HERITAGE*****Article 4***

Each State Party to this Convention recognizes that the duty of ensuring the identification, protection, conservation, presentation and transmission to future generations of the cultural and natural heritage referred to in Articles 1 and 2 and situated on its territory, belongs primarily to that State. It will do all it can to this end, to the utmost of its own resources and, where appropriate, with any international assistance and co-operation, in particular, financial, artistic, scientific and technical, which it may be able to obtain.

Article 5

To ensure that effective and active measures are taken for the protection, conservation and presentation of the cultural and natural heritage situated on its territory, each State Party to this Convention shall endeavor, in so far as possible, and as appropriate for each country:

- (a) to adopt a general policy which aims to give the cultural and natural heritage a function in the life of the community and to integrate the protection of that heritage into comprehensive planning programmes;
- (b) to set up within its territories, where such services do not exist, one or more services for the protection, conservation and presentation of the cultural and natural heritage with an appropriate staff and possessing the means to discharge their functions;
- (c) to develop scientific and technical studies and research and to work out such operating methods as will make the State capable of counteracting the dangers that threaten its cultural or natural heritage;
- (d) to take the appropriate legal, scientific, technical, administrative and financial measures necessary for the identification, protection, conservation, presentation and rehabilitation of this heritage; and
- (e) to foster the establishment or development of national or regional centres for training in the protection, conservation and presentation of the cultural and natural heritage and to encourage scientific research in this field.

Article 6

1. Whilst fully respecting the sovereignty of the States on whose territory the cultural and natural heritage mentioned in Articles 1 and 2 is situated, and without prejudice to property right provided by national legislation, the States Parties to this Convention recognize that such heritage constitutes a world heritage for whose protection it is the duty of the international community as a whole to co-operate.
2. The States Parties undertake, in accordance with the provisions of this Convention, to give their help in the identification, protection, conservation and presentation of the cultural and natural heritage referred to in paragraphs 2 and 4 of Article 11 if the States on whose territory it is situated so request.
3. Each State Party to this Convention undertakes not to take any deliberate measures which might damage directly or indirectly the cultural and natural heritage referred to in Articles 1 and 2 situated on the territory of other States Parties to this Convention.

Article 7

For the purpose of this Convention, international protection of the world cultural and natural heritage shall be understood to mean the establishment of a system of international cooperation and assistance designed to support States Parties to the Convention in their efforts to conserve and identify that heritage.

III INTERGOVERNMENTAL COMMITTEE FOR THE PROTECTION OF THE WORLD CULTURAL AND NATURAL HERITAGE

Article 8

1. An Intergovernmental Committee for the Protection of the Cultural and Natural Heritage of Outstanding Universal Value, called "the World Heritage Committee", is hereby established within the United Nations Educational, Scientific and Cultural Organization. It shall be composed of 15 States Parties to the Convention, elected by States Parties to the

Convention meeting in general assembly during the ordinary session of the General Conference of the United Nations Educational, Scientific and Cultural Organization. The number of States members of the Committee shall be increased to 21 as from the date of the ordinary session of the General Conference following the entry into force of this Convention for at least 40 States.

2. Election of members of the Committee shall ensure an equitable representation of the different regions and cultures of the world.
3. A representative of the International Centre for the Study of the Preservation and Restoration of Cultural Property (Rome Centre), a representative of the International Council of Monuments and Sites (ICOMOS) and a representative of the International Union for Conservation of Nature and Natural Resources (IUCN), to whom may be added, at the request of States Parties to the Convention meeting in general assembly during the ordinary sessions of the General Conference of the United Nations Educational, Scientific and Cultural Organization, representatives of other intergovernmental or non-governmental organizations, with similar objectives, may attend the meetings of the Committee in an advisory capacity.

Article 9

1. The term of office of States members of the World Heritage Committee shall extend from the end of the ordinary session of the General Conference during which they are elected until the end of its third subsequent ordinary session.
2. The term of office of one-third of the members designated at the time of the first election shall, however, cease at the end of the first ordinary session of the General Conference following that at which they were elected; and the term of office of a further third of the members designated at the same time shall cease at the end of the second ordinary session of the General Conference following that at which they were elected. The names of these members shall be chosen by lot by the President of the General Conference of the United Nations Educational, Scientific and Cultural Organization after the first election.
3. States members of the Committee shall choose as their representatives persons qualified in the field of the cultural or natural heritage.

Article 10

1. The World Heritage Committee shall adopt its Rules of Procedure.
2. The Committee may at any time invite public or private organizations or individuals to participate in its meetings for consultation on particular problems.
3. The Committee may create such consultative bodies as it deems necessary for the performance of its functions.

Article 11

1. Every State Party to this Convention shall, in so far as possible, submit to the World Heritage Committee an inventory of property forming part of the cultural and natural heritage, situated in its territory and suitable for inclusion in the list provided for in paragraph 2 of this Article. This inventory, which shall not be considered exhaustive, shall include documentation about the location of the property in question and its significance.

2. On the basis of the inventories submitted by States in accordance with paragraph 1, the Committee shall establish, keep up to date and publish, under the title of "World Heritage List," a list of properties forming part of the cultural heritage and natural heritage, as defined in Articles 1 and 2 of this Convention, which it considers as having outstanding universal value in terms of such criteria as it shall have established. An updated list shall be distributed at least every two years.
3. The inclusion of a property in the World Heritage List requires the consent of the State concerned. The inclusion of a property situated in a territory, sovereignty or jurisdiction over which is claimed by more than one State shall in no way prejudice the rights of the parties to the dispute.
4. The Committee shall establish, keep up to date and publish, whenever circumstances shall so require, under the title of "list of World Heritage in Danger", a list of the property appearing in the World Heritage List for the conservation of which major operations are necessary and for which assistance has been requested under this Convention. This list shall contain an estimate of the cost of such operations. The list may include only such property forming part of the cultural and natural heritage as is threatened by serious and specific dangers, such as the threat of disappearance caused by accelerated deterioration, large-scale public or private projects or rapid urban or tourist development projects; destruction caused by changes in the use or ownership of the land; major alterations due to unknown causes; abandonment for any reason whatsoever; the outbreak or the threat of an armed conflict; calamities and cataclysms; serious fires, earthquakes, landslides; volcanic eruptions; changes in water level, floods and tidal waves. The Committee may at any time, in case of urgent need, make a new entry in the List of World Heritage in Danger and publicize such entry immediately.
5. The Committee shall define the criteria on the basis of which a property belonging to the cultural or natural heritage may be included in either of the lists mentioned in paragraphs 2 and 4 of this article.
6. Before refusing a request for inclusion in one of the two lists mentioned in paragraphs 2 and 4 of this article, the Committee shall consult the State Party in whose territory the cultural or natural property in question is situated.
7. The Committee shall, with the agreement of the States concerned, co-ordinate and encourage the studies and research needed for the drawing up of the lists referred to in paragraphs 2 and 4 of this article.

Article 12

The fact that a property belonging to the cultural or natural heritage has not been included in either of the two lists mentioned in paragraphs 2 and 4 of Article 11 shall in no way be construed to mean that it does not have an outstanding universal value for purposes other than those resulting from inclusion in these lists.

Article 13

1. The World Heritage Committee shall receive and study requests for international assistance formulated by States Parties to this Convention with respect to property forming part of the cultural or natural heritage, situated in their territories, and included or potentially suitable

for inclusion in the lists mentioned referred to in paragraphs 2 and 4 of Article 11. The purpose of such requests may be to secure the protection, conservation, presentation or rehabilitation of such property.

2. Requests for international assistance under paragraph 1 of this article may also be concerned with identification of cultural or natural property defined in Articles 1 and 2, when preliminary investigations have shown that further inquiries would be justified.
3. The Committee shall decide on the action to be taken with regard to these requests, determine where appropriate, the nature and extent of its assistance, and authorize the conclusion, on its behalf, of the necessary arrangements with the government concerned.
4. The Committee shall determine an order of priorities for its operations. It shall in so doing bear in mind the respective importance for the world cultural and natural heritage of the property requiring protection, the need to give international assistance to the property most representative of a natural environment or of the genius and the history of the peoples of the world, the urgency of the work to be done, the resources available to the States on whose territory the threatened property is situated and in particular the extent to which they are able to safeguard such property by their own means.
5. The Committee shall draw up, keep up to date and publicize a list of property for which international assistance has been granted.
6. The Committee shall decide on the use of the resources of the Fund established under Article 15 of this Convention. It shall seek ways of increasing these resources and shall take all useful steps to this end.
7. The Committee shall co-operate with international and national governmental and non-governmental organizations having objectives similar to those of this Convention. For the implementation of its programmes and projects, the Committee may call on such organizations, particularly the International Centre for the Study of the Preservation and Restoration of Cultural Property (the Rome Centre), the International Council of Monuments and Sites (ICOMOS) and the International Union for Conservation of Nature and Natural Resources (IUCN), as well as on public and private bodies and individuals.
8. Decisions of the Committee shall be taken by a majority of two-thirds of its members present and voting. A majority of the members of the Committee shall constitute a quorum.

Article 14

1. The World Heritage Committee shall be assisted by a Secretariat appointed by the Director-General of the United Nations Educational, Scientific and Cultural Organization.
2. The Director-General of the United Nations Educational, Scientific and Cultural Organization, utilizing to the fullest extent possible the services of the International Centre for the Study of the Preservation and the Restoration of Cultural Property (the Rome Centre), the International Council of Monuments and Sites (ICOMOS) and the International Union for Conservation of Nature and Natural Resources (IUCN) in their respective areas of competence and capability, shall prepare the Committee's documentation and the agenda of its meetings and shall have the responsibility for the implementation of its decisions.

 - (e) all other resources authorized by the Fund's regulations, as drawn up by the World Heritage Committee.
4. Contributions to the Fund and other forms of assistance made available to the Committee may be used only for such purposes as the Committee shall define. The Committee may accept contributions to be used only for a certain programme or project, provided that the Committee shall have decided on the implementation of such programme or project. No political conditions may be attached to contributions made to the Fund.

Article 16

1. Without prejudice to any supplementary voluntary contribution, the States Parties to this Convention undertake to pay regularly, every two years, to the World Heritage Fund, contributions, the amount of which, in the form of a uniform percentage applicable to all States, shall be determined by the General Assembly of States Parties to the Convention, meeting during the sessions of the General Conference of the United Nations Educational, Scientific and Cultural Organization. This decision of the General Assembly requires the majority of the States Parties present and voting, which have not made the declaration referred to in paragraph 2 of this Article. In no case shall the compulsory contribution of States Parties to the Convention exceed 1% of the contribution to the regular budget of the United Nations Educational, Scientific and Cultural Organization.
2. However, each State referred to in Article 31 or in Article 32 of this Convention may declare, at the time of the deposit of its instrument of ratification, acceptance or accession, that it shall not be bound by the provisions of paragraph 1 of this Article.

3. A State Party to the Convention which has made the declaration referred to in paragraph 2 of this Article may at any time withdraw the said declaration by notifying the Director-General of the United Nations Educational, Scientific and Cultural Organization. However, the withdrawal of the declaration shall not take effect in regard to the compulsory contribution due by the State until the date of the subsequent General Assembly of States parties to the Convention.
4. In order that the Committee may be able to plan its operations effectively, the contributions of States Parties to this Convention which have made the declaration referred to in paragraph 2 of this Article, shall be paid on a regular basis, at least every two years, and should not be less than the contributions which they should have paid if they had been bound by the provisions of paragraph 1 of this Article.
5. Any State Party to the Convention which is in arrears with the payment of its compulsory or voluntary contribution for the current year and the calendar year immediately preceding it shall not be eligible as a Member of the World Heritage Committee, although this provision shall not apply to the first election.

The terms of office of any such State which is already a member of the Committee shall terminate at the time of the elections provided for in Article 8, paragraph 1 of this Convention.

Article 17

The States Parties to this Convention shall consider or encourage the establishment of national public and private foundations or associations whose purpose is to invite donations for the protection of the cultural and natural heritage as defined in Articles 1 and 2 of this Convention.

Article 18

The States Parties to this Convention shall give their assistance to international fund-raising campaigns organized for the World Heritage Fund under the auspices of the United Nations Educational, Scientific and Cultural Organization. They shall facilitate collections made by the bodies mentioned in paragraph 3 of Article 15 for this purpose.

V. CONDITIONS AND ARRANGEMENTS FOR INTERNATIONAL ASSISTANCE

Article 19

Any State Party to this Convention may request international assistance for property forming part of the cultural or natural heritage of outstanding universal value situated within its territory. It shall submit with its request such information and documentation provided for in Article 21 as it has in its possession and as will enable the Committee to come to a decision.

Article 20

Subject to the provisions of paragraph 2 of Article 13, sub-paragraph (c) of Article 22 and Article 23, international assistance provided for by this Convention may be granted only to property forming part of the cultural and natural heritage which the World Heritage Committee has decided, or may decide, to enter in one of the lists mentioned in paragraphs 2 and 4 of Article 11.

Article 21

1. The World Heritage Committee shall define the procedure by which requests to it for international assistance shall be considered and shall specify the content of the request, which should define the operation contemplated, the work that is necessary, the expected cost thereof, the degree of urgency and the reasons why the resources of the State requesting assistance do not allow it to meet all the expenses. Such requests must be supported by experts' reports whenever possible.
2. Requests based upon disasters or natural calamities should, by reasons of the urgent work which they may involve, be given immediate, priority consideration by the Committee, which should have a reserve fund at its disposal against such contingencies.
3. Before coming to a decision, the Committee shall carry out such studies and consultations as it deems necessary.

Article 22

Assistance granted by the World Heritage Fund may take the following forms:

- (a) studies concerning the artistic, scientific and technical problems raised by the protection, conservation, presentation and rehabilitation of the cultural and natural heritage, as defined in paragraphs 2 and 4 of Article 11 of this Convention;
- (b) provisions of experts, technicians and skilled labour to ensure that the approved work is correctly carried out;

- (f) the granting, in exceptional cases and for special reasons, of non-repayable subsidies.

Article 23

The World Heritage Committee may also provide international assistance to national or regional centres for the training of staff and specialists at all levels in the field of identification, protection, conservation, presentation and rehabilitation of the cultural and natural heritage.

Article 24

International assistance on a large scale shall be preceded by detailed scientific, economic and technical studies. These studies shall draw upon the most advanced techniques for the protection, conservation, presentation and rehabilitation of the natural and cultural heritage and shall be consistent with the objectives of this Convention. The studies shall also seek means of making rational use of the resources available in the State concerned.

Article 25

As a general rule, only part of the cost of work necessary shall be borne by the international community. The contribution of the State benefiting from international assistance shall

constitute a substantial share of the resources devoted to each programme or project, unless its resources do not permit this.

Article 26

The World Heritage Committee and the recipient State shall define in the agreement they conclude the conditions in which a programme or project for which international assistance under the terms of this Convention is provided, shall be carried out. It shall be the responsibility of the State receiving such international assistance to continue to protect, conserve and present the property so safeguarded, in observance of the conditions laid down by the agreement.

VI. EDUCATIONAL PROGRAMMES

Article 27

1. The States Parties to this Convention shall endeavor by all appropriate means, and in particular by educational and information programmes, to strengthen appreciation and respect by their peoples of the cultural and natural heritage defined in Articles 1 and 2 of the Convention.
2. They shall undertake to keep the public broadly informed of the dangers threatening this heritage and of the activities carried on in pursuance of this Convention.

Article 28

States Parties to this Convention which receive international assistance under the Convention shall take appropriate measures to make known the importance of the property for which assistance has been received and the role played by such assistance.

VII. REPORTS

Article 29

1. The States Parties to this Convention shall, in the reports which they submit to the General Conference of the United Nations Educational, Scientific and Cultural Organization on dates and in a manner to be determined by it, give information on the legislative and administrative provisions which they have adopted and other action which they have taken for the application of this Convention, together with details of the experience acquired in this field.

Section 117

UNIDROIT CONVENTION ON STOLEN OR ILLEGALLY EXPORTED CULTURAL OBJECTS DONE AT ROME ON 24
JUNE 1995

(Rome, 24 June 1995)

THE STATES PARTIES TO THIS CONVENTION,

ASSEMBLED in Rome at the invitation of the Government of the Italian Republic from 7 to 24 June 1995 for a Diplomatic Conference for the adoption of the draft UNIDROIT Convention on the International Return of Stolen or Illegally Exported Cultural Objects,

CONVINCED of the fundamental importance of the protection of cultural heritage and of cultural exchanges for promoting understanding between peoples, and the dissemination of culture for the well-being of humanity and the progress of civilisation,

DEEPLY CONCERNED by the illicit trade in cultural objects and the irreparable damage frequently caused by it, both to these objects themselves and to the cultural heritage of national, tribal, indigenous or other communities, and also to the heritage of all peoples, and in particular by the pillage of archaeological sites and the resulting loss of irreplaceable archaeological, historical and scientific information,

DETERMINED to contribute effectively to the fight against illicit trade in cultural objects by taking the important step of establishing common, minimal legal rules for the restitution and return of cultural objects between Contracting States, with the objective of improving the preservation and protection of the cultural heritage in the interest of all,

EMPHASISING that this Convention is intended to facilitate the restitution and return of cultural objects, and that the provision of any remedies, such as compensation, needed to effect restitution and return in some States, does not imply that such remedies should be adopted in other States,

AFFIRMING that the adoption of the provisions of this Convention for the future in no way confers any approval or legitimacy upon illegal transactions of whatever kind which may have taken place before the entry into force of the Convention,

CONSCIOUS that this Convention will not by itself provide a solution to the problems raised by illicit trade, but that it initiates a process that will enhance international cultural co-operation and maintain a proper role for legal trading and inter-State agreements for cultural exchanges,

ACKNOWLEDGING that implementation of this Convention should be accompanied by other effective measures for protecting cultural objects, such as the development and use of registers, the protection of archaeological sites and technical co-operation,

RECOGNISING the work of various bodies to protect cultural property, particularly the 1970 UNESCO Convention on illicit traffic and the development of codes of conduct in the private sector,

HAVE AGREED as follows:

CHAPTER I

SCOPE OF APPLICATION AND DEFINITION*Article 1*

This Convention applies to claims of an international character for:

- (a) the restitution of stolen cultural objects;
- (b) the return of cultural objects removed from the territory of a Contracting State contrary to its law regulating the export of cultural objects for the purpose of protecting its cultural heritage (hereinafter “illegally exported cultural objects”).

Article 2

For the purposes of this Convention, cultural objects are those which, on religious or secular grounds, are of importance for archaeology, prehistory, history, literature, art or science and belong to one of the categories listed in the Annex to this Convention.

CHAPTER II

RESTITUTION OF STOLEN CULTURAL OBJECTS*Article 3*

- (1) The possessor of a cultural object which has been stolen shall return it.
- (2) For the purposes of this Convention, a cultural object which has been unlawfully excavated or lawfully excavated but unlawfully retained shall be considered stolen, when consistent with the law of the State where the excavation took place.
- (3) Any claim for restitution shall be brought within a period of three years from the time when the claimant knew the location of the cultural object and the identity of its possessor, and in any case within a period of fifty years from the time of the theft.
- (4) However, a claim for restitution of a cultural object forming an integral part of an identified monument or archaeological site, or belonging to a public collection, shall not be subject to time limitations other than a period of three years from the time when the claimant knew the location of the cultural object and the identity of its possessor.
- (5) Notwithstanding the provisions of the preceding paragraph, any Contracting State may declare that a claim is subject to a time limitation of 75 years or such longer period as is provided in its law. A claim made in another Contracting State for restitution of a cultural object displaced from a monument, archaeological site or public collection in a Contracting State making such a declaration shall also be subject to that time limitation.
- (6) A declaration referred to in the preceding paragraph shall be made at the time of signature, ratification, acceptance, approval or accession.
- (7) For the purposes of this Convention, a “public collection” consists of a group of inventoried or otherwise identified cultural objects owned by:
 - (a) a Contracting State

- (b) a regional or local authority of a Contracting State;
 - (c) a religious institution in a Contracting State; or
 - (d) an institution that is established for an essentially cultural, educational or scientific purpose in a Contracting State and is recognised in that State as serving the public interest.
- (8) In addition, a claim for restitution of a sacred or communally important cultural object belonging to and used by a tribal or indigenous community in a Contracting State as part of that community's traditional or ritual use, shall be subject to the time limitation applicable to public collections.

Article 4

- (1) The possessor of a stolen cultural object required to return it shall be entitled, at the time of its restitution, to payment of fair and reasonable compensation provided that the possessor neither knew nor ought reasonably to have known that the object was stolen and can prove that it exercised due diligence when acquiring the object.
- (2) Without prejudice to the right of the possessor to compensation referred to in the preceding paragraph, reasonable efforts shall be made to have the person who transferred the cultural object to the possessor, or any prior transferor, pay the compensation where to do so would be consistent with the law of the State in which the claim is brought.
- (3) Payment of compensation to the possessor by the claimant, when this is required, shall be without prejudice to the right of the claimant to recover it from any other person.
- (4) In determining whether the possessor exercised due diligence, regard shall be had to all the circumstances of the acquisition, including the character of the parties, the price paid, whether the possessor consulted any reasonably accessible register of stolen cultural objects, and any other relevant information and documentation which it could reasonably have obtained, and whether the possessor consulted accessible agencies or took any other step that a reasonable person would have taken in the circumstances.
- (5) The possessor shall not be in a more favourable position than the person from whom it acquired the cultural object by inheritance or otherwise gratuitously.

CHAPTER III

RETURN OF ILLEGALLY EXPORTED CULTURAL OBJECTS

Article 5

- (1) A Contracting State may request the court or other competent authority of another Contracting State to order the return of a cultural object illegally exported from the territory of the requesting State.
- (2) A cultural object which has been temporarily exported from the territory of the requesting State, for purposes such as exhibition, research or restoration, under a permit issued according to its law regulating its export for the purpose of protecting its cultural heritage and not returned in accordance with the terms of that permit shall be deemed to have been illegally exported.

- (3) The court or other competent authority of the State addressed shall order the return of an illegally exported cultural object if the requesting State establishes that the removal of the object from its territory significantly impairs one or more of the following interests:
- (a) the physical preservation of the object or of its context;
 - (b) the integrity of a complex object;
 - (c) the preservation of information of, for example, a scientific or historical character;
 - (d) the traditional or ritual use of the object by a tribal or indigenous community,
- or establishes that the object is of significant cultural importance for the requesting State.
- (4) Any request made under paragraph 1 of this article shall contain or be accompanied by such information of a factual or legal nature as may assist the court or other competent authority of the State addressed in determining whether the requirements of paragraphs 1 to 3 have been met.
- (5) Any request for return shall be brought within a period of three years from the time when the requesting State knew the location of the cultural object and the identity of its possessor, and in any case within a period of fifty years from the date of the export or from the date on which the object should have been returned under a permit referred to in paragraph 2 of this article.

Article 6

- (1) The possessor of a cultural object who acquired the object after it was illegally exported shall be entitled, at the time of its return, to payment by the requesting State of fair and reasonable compensation, provided that the possessor neither knew nor ought reasonably to have known at the time of acquisition that the object had been illegally exported.
- (2) In determining whether the possessor knew or ought reasonably to have known that the cultural object had been illegally exported, regard shall be had to the circumstances of the acquisition, including the absence of an export certificate required under the law of the requesting State.
- (3) Instead of compensation, and in agreement with the requesting State, the possessor required to return the cultural object to that State, may decide:
- (a) to retain ownership of the object; or
 - (b) to transfer ownership against payment or gratuitously to a person of its choice residing in the requesting State who provides the necessary guarantees.
- (4) The cost of returning the cultural object in accordance with this article shall be borne by the requesting State, without prejudice to the right of that State to recover costs from any other person.
- (5) The possessor shall not be in a more favourable position than the person from whom it acquired the cultural object by inheritance or otherwise gratuitously.

Article 7

- (1) The provisions of this Chapter shall not apply where:

- (a) the export of a cultural object is no longer illegal at the time at which the return is requested; or
 - (b) the object was exported during the lifetime of the person who created it or within a period of fifty years following the death of that person.
- (2) Notwithstanding the provisions of sub-paragraph (b) of the preceding paragraph, the provisions of this Chapter shall apply where a cultural object was made by a member or members of a tribal or indigenous community for traditional or ritual use by that community and the object will be returned to that community.

CHAPTER IV

GENERAL PROVISIONS

Article 8

- (1) A claim under Chapter II and a request under Chapter III may be brought before the courts or other competent authorities of the Contracting State where the cultural object is located, in addition to the courts or other competent authorities otherwise having jurisdiction under the rules in force in Contracting States.
- (2) The parties may agree to submit the dispute to any court or other competent authority or to arbitration.

Article 9

- (1) Nothing in this Convention shall prevent a Contracting State from applying any rules more favourable to the restitution or the return of stolen or illegally exported cultural objects than provided for by this Convention.
- (2) This article shall not be interpreted as creating an obligation to recognise or enforce a decision of a court or other competent authority of another Contracting State that departs from the provisions of this Convention.

Article 10

- (1) The provisions of Chapter II shall apply only in respect of a cultural object that is stolen after this Convention enters into force in respect of the State where the claim is brought, provided that:
- (a) the object was stolen from the territory of a Contracting State after the entry into force of this Convention for that State; or
 - (b) the object is located in a Contracting State after the entry into force of the Convention for that State.
- (2) The provisions of Chapter III shall apply only in respect of a cultural object that is illegally exported after this Convention enters into force for the requesting State as well as the State

where the request is brought.

- (3) This Convention does not in any way legitimise any illegal transaction of whatever nature which has taken place before the entry into force of this Convention or which is excluded under paragraphs (1) or (2) of this article, nor limit any right of a State or other person to make a claim under remedies available outside the framework of this Convention for the restitution or return of a cultural object stolen or illegally exported before the entry into force of this Convention.

SCHEDULE 6

*Section 125*UNESCO CONVENTION ON MEANS OF PROHIBITING AND PREVENTING THE ILLICIT IMPORT, EXPORT AND
TRANSFER OF OWNERSHIP OF CULTURAL PROPERTY DONE IN PARIS ON 17 NOVEMBER 1970

The General Conference of the United Nations Educational, Scientific and Cultural Organization, meeting in Paris from 12 October to 14 November 1970, at its sixteenth session,

Recalling the importance of the provisions contained in the Declaration of the Principles of International Cultural Co-operation, adopted by the General Conference at its fourteenth session,

Considering that the interchange of cultural property among nations for scientific, cultural and educational purposes increases the knowledge of the civilization of Man, enriches the cultural life of all peoples and inspires mutual respect and appreciation among nations,

Considering that cultural property constitutes one of the basic elements of civilization and national culture, and that its true value can be appreciated only in relation to the fullest possible information regarding its origin, history and traditional setting,

Considering that it is incumbent upon every State to protect the cultural property existing within its territory against the dangers of theft, clandestine excavation, and illicit export,

Considering that, to avert these dangers, it is essential for every State to become increasingly alive to the moral obligations to respect its own cultural heritage and that of all nations,

Considering that, as cultural institutions, museums, libraries and archives should ensure that their collections are built up in accordance with universally recognized moral principles,

Considering that the illicit import, export and transfer of ownership of cultural property is an obstacle to that understanding between nations which it is part of UNESCO's mission to promote by recommending to interested States, international conventions to this end,

Considering that the protection of cultural heritage can be effective only if organized both nationally and internationally among States working in close co-operation,

Considering that the UNESCO General Conference adopted a Recommendation to this effect in 1964,

Having before it further proposals on the means of prohibiting and preventing the illicit import, export and transfer of ownership of cultural property, a question which is on the agenda for the session as item 19,

Having decided, at its fifteenth session, that this question should be made the subject of an international convention,

Adopts this Convention on the fourteenth day of November 1970.

- (k) Articles of furniture more than one hundred years old and old musical instruments.

Article 2

1. The States Parties to this Convention recognize that the illicit import, export and transfer of ownership of cultural property is one of the main causes of the impoverishment of the cultural heritage of the countries of origin of such property and that international co-operation constitutes one of the most efficient means of protecting each country's cultural property against all the dangers resulting therefrom.
2. To this end, the States Parties undertake to oppose such practices with the means at their disposal, and particularly by removing their causes, putting a stop to current practices, and by helping to make the necessary reparations.

Article 3

The import, export or transfer of ownership of cultural property effected contrary to the provisions adopted under this Convention by the States Parties thereto, shall be illicit.

Article 4

The States Parties to this Convention recognize that for the purpose of the Convention property which belongs to the following categories forms part of the cultural heritage of each State:

- (d) Organizing the supervision of archaeological excavations, ensuring the preservation in situ of certain cultural property, and protecting certain areas reserved for future archaeological research;

Article 6

The States Parties to this Convention undertake:

- (a) To introduce an appropriate certificate in which the exporting State would specify that the export of the cultural property in question is authorized. The certificate should accompany all items of cultural property exported in accordance with the regulations;
- (b) To prohibit the exportation of cultural property from their territory unless accompanied by the above-mentioned export certificate;
- (c) To publicize this prohibition by appropriate means, particularly among persons likely to export or import cultural property.

Article 7

The States Parties to this Convention undertake:

- (a) To take the necessary measures, consistent with national legislation, to prevent museums and similar institutions within their territories from acquiring cultural property originating in another State Party which has been illegally exported after entry into force of this Convention, in the States concerned. Whenever possible, to inform a State of origin Party to this Convention of an offer of such cultural property illegally removed from that State after the entry into force of this Convention in both States;
- (b) (i) to prohibit the import of cultural property stolen from a museum or a religious or secular public monument or similar institution in another State Party to this Convention after the entry into force of this Convention for the States concerned, provided that such property is documented as appertaining to the inventory of that institution;
- (ii) at the request of the State Party of origin, to take appropriate steps to recover and return any such cultural property imported after the entry into force of this Convention in both States concerned, provided, however, that the requesting State shall pay just compensation to an innocent purchaser or to a person who has valid title to that property. Requests for recovery and return shall be made through diplomatic offices. The requesting Party shall furnish, at its expense, the documentation and other evidence necessary to establish its claim for recovery and return. The Parties shall impose no customs duties or other charges upon cultural property returned pursuant to this Article. All expenses incident to the return and delivery of the cultural property shall be borne by the requesting Party.

Article 8

The States Parties to this Convention undertake to impose penalties or administrative sanctions on any person responsible for infringing the prohibitions referred to under Articles 6(b) and 7(b) above.

Article 9

Any State Party to this Convention whose cultural patrimony is in jeopardy from pillage of archaeological or ethnological materials may call upon other States Parties who are affected.

The States Parties to this Convention undertake, in these circumstances, to participate in a concerted international effort to determine and to carry out the necessary concrete measures, including the control of exports and imports and international commerce in the specific materials concerned. Pending agreement each State concerned shall take provisional measures to the extent feasible to prevent irremediable injury to the cultural heritage of the requesting State.

Article 10

The States Parties to this Convention undertake:

- (a) To restrict by education, information and vigilance, movement of cultural property illegally removed from any State Party to this Convention and, as appropriate for each country, oblige antique dealers, subject to penal or administrative sanctions, to maintain a register recording the origin of each item of cultural property, names and addresses of the supplier, description and price of each item sold and to inform the purchaser of the cultural property of the export prohibition to which such property may be subject;
- (b) To endeavour by educational means to create and develop in the public mind a realization of the value of cultural property and the threat to the cultural heritage created by theft, clandestine excavations and illicit exports.

Article 11

The export and transfer of ownership of cultural property under compulsion arising directly or indirectly from the occupation of a country by a foreign power shall be regarded as illicit.

Article 12

The States Parties to this Convention shall respect the cultural heritage within the territories for the international relations of which they are responsible, and shall take all appropriate measures to prohibit and prevent the illicit import, export and transfer of ownership of cultural property in such territories.

Article 13

The States Parties to this Convention also undertake, consistent with the laws of each State:

- (a) To prevent by all appropriate means transfers of ownership of cultural property likely to promote the illicit import or export of such property;
- (b) To ensure that their competent services co-operate in facilitating the earliest possible restitution of illicitly exported cultural property to its rightful owner;
- (c) To admit actions for recovery of lost or stolen items of cultural property brought by or on behalf of the rightful owners;
- (d) To recognize the indefeasible right of each State Party to this Convention to classify and declare certain cultural property as inalienable which should therefore ipso facto not be exported, and to facilitate recovery of such property by the State concerned in cases where it has been exported.

Article 14

In order to prevent illicit export and to meet the obligations arising from the implementation of this Convention, each State Party to the Convention should, as far as it is able, provide the national services responsible for the protection of its cultural heritage with an adequate budget and, if necessary, should set up a fund for this purpose.

Article 15

Nothing in this Convention shall prevent States Parties thereto from concluding special agreements among themselves or from continuing to implement agreements already concluded regarding the restitution of cultural property removed, whatever the reason, from its territory of origin, before the entry into force of this Convention for the States concerned.

Article 16

Realizing the importance of protecting and preserving the underwater cultural heritage and that responsibility therefor rests with all States,

Noting growing public interest in and public appreciation of underwater cultural heritage,

Convinced of the importance of research, information and education to the protection and preservation of underwater cultural heritage,

Convinced of the public's right to enjoy the educational and recreational benefits of responsible non-intrusive access to in situ underwater cultural heritage, and of the value of public education to contribute to awareness, appreciation and protection of that heritage,

Aware of the fact that underwater cultural heritage is threatened by unauthorized activities directed at it, and of the need for stronger measures to prevent such activities,

Conscious of the need to respond appropriately to the possible negative impact on underwater cultural heritage of legitimate activities that may incidentally affect it,

Deeply concerned by the increasing commercial exploitation of underwater cultural heritage, and in particular by certain activities aimed at the sale, acquisition or barter of underwater cultural heritage,

Aware of the availability of advanced technology that enhances discovery of and access to underwater cultural heritage,

Believing that cooperation among States, international organizations, scientific institutions, professional organizations, archaeologists, divers, other interested parties and the public at large is essential for the protection of underwater cultural heritage,

Considering that survey, excavation and protection of underwater cultural heritage necessitate the availability and application of special scientific methods and the use of suitable techniques and equipment as well as a high degree of professional specialization, all of which indicate a need for uniform governing criteria,

Realizing the need to codify and progressively develop rules relating to the protection and preservation of underwater cultural heritage in conformity with international law and practice, including the UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property of 14 November 1970, the UNESCO Convention for the Protection of the World Cultural and Natural Heritage of 16 November 1972 and the United Nations Convention on the Law of the Sea of 10 December 1982,

Committed to improving the effectiveness of measures at international, regional and national levels for the preservation in situ or, if necessary for scientific or protective purposes, the careful recovery of underwater cultural heritage,

Having decided at its twenty-ninth session that this question should be made the subject of an international convention,

6. In coordinating consultations, taking measures, conducting preliminary research and/or issuing authorizations pursuant to this Article, the Coordinating State shall act on behalf of the States Parties as a whole and not in its own interest. Any such action shall not in itself constitute a basis for the assertion of any preferential or jurisdictional rights not provided for in international law, including the United Nations Convention on the Law of the Sea.

In conformity with Article 102 of the Charter of the United Nations, this Convention shall be registered with the Secretariat of the United Nations at the request of the Director-General.

Article 35**Authoritative texts**

This Convention has been drawn up in Arabic, Chinese, English, French, Russian and Spanish, the six texts being equally authoritative.

Annex: Rules concerning activities directed at underwater cultural heritage**I. General principles**

Rule 1. The protection of underwater cultural heritage through in situ preservation shall be considered as the first option. Accordingly, activities directed at underwater cultural heritage shall be authorized in a manner consistent with the protection of that heritage, and subject to that requirement may be authorized for the purpose of making a significant contribution to protection or knowledge or enhancement of underwater cultural heritage.

Rule 2. The commercial exploitation of underwater cultural heritage for trade or speculation or its irretrievable dispersal is fundamentally incompatible with the protection and proper management of underwater cultural heritage. Underwater cultural heritage shall not be traded, sold, bought or bartered as commercial goods.

This Rule cannot be interpreted as preventing:

- (a) the provision of professional archaeological services or necessary services incidental thereto whose nature and purpose are in full conformity with this Convention and are subject to the authorization of the competent authorities;
- (b) the deposition of underwater cultural heritage, recovered in the course of a research project in conformity with this Convention, provided such deposition does not prejudice the scientific or cultural interest or integrity of the recovered material or result in its irretrievable dispersal; is in accordance with the provisions of Rules 33 and 34; and is subject to the authorization of the competent authorities.

Rule 3. Activities directed at underwater cultural heritage shall not adversely affect the underwater cultural heritage more than is necessary for the objectives of the project.

Rule 4. Activities directed at underwater cultural heritage must use non-destructive techniques

and survey methods in preference to recovery of objects. If excavation or recovery is necessary for the purpose of scientific studies or for the ultimate protection of the underwater cultural heritage, the methods and techniques used must be as non-destructive as possible and contribute to the preservation of the remains.

Rule 5. Activities directed at underwater cultural heritage shall avoid the unnecessary disturbance of human remains or venerated sites.

Rule 6. Activities directed at underwater cultural heritage shall be strictly regulated to ensure proper recording of cultural, historical and archaeological information.

Rule 7. Public access to in situ underwater cultural heritage shall be promoted, except where such access is incompatible with protection and management.

Rule 8. International cooperation in the conduct of activities directed at underwater cultural heritage shall be encouraged in order to further the effective exchange or use of archaeologists and other relevant professionals.

II. Project design

Rule 9. Prior to any activity directed at underwater cultural heritage, a project design for the activity shall be developed and submitted to the competent authorities for authorization and appropriate peer review.

Rule 10. The project design shall include:

- (a) an evaluation of previous or preliminary studies;
- (b) the project statement and objectives;
- (c) the methodology to be used and the techniques to be employed;
- (d) the anticipated funding;
- (e) an expected timetable for completion of the project;
- (f) the composition of the team and the qualifications, responsibilities and experience of each team member;
- (g) plans for post-fieldwork analysis and other activities;
- (h) a conservation programme for artefacts and the site in close cooperation with the competent authorities;
- (i) a site management and maintenance policy for the whole duration of the project;
- (j) a documentation programme;
- (k) a safety policy;
- (l) an environmental policy;
- (m) arrangements for collaboration with museums and other institutions, in particular scientific institutions;
- (n) report preparation;

- (o) deposition of archives, including underwater cultural heritage removed; and
- (p) a programme for publication.

Rule 11. Activities directed at underwater cultural heritage shall be carried out in accordance with the project design approved by the competent authorities.

Rule 12. Where unexpected discoveries are made or circumstances change, the project design shall be reviewed and amended with the approval of the competent authorities.

Rule 13. In cases of urgency or chance discoveries, activities directed at the underwater cultural heritage, including conservation measures or activities for a period of short duration, in particular site stabilization, may be authorized in the absence of a project design in order to protect the underwater cultural heritage.

III. Preliminary work

Rule 14. The preliminary work referred to in Rule 10 (a) shall include an assessment that evaluates the significance and vulnerability of the underwater cultural heritage and the surrounding natural environment to damage by the proposed project, and the potential to obtain data that would meet the project objectives.

Rule 15. The assessment shall also include background studies of available historical and archaeological evidence, the archaeological and environmental characteristics of the site, and the consequences of any potential intrusion for the long-term stability of the underwater cultural heritage affected by the activities.

IV. Project objective, methodology and techniques

Rule 16. The methodology shall comply with the project objectives, and the techniques employed shall be as non-intrusive as possible.

V. Funding

Rule 17. Except in cases of emergency to protect underwater cultural heritage, an adequate funding base shall be assured in advance of any activity, sufficient to complete all stages of the project design, including conservation, documentation and curation of recovered artefacts, and report preparation and dissemination.

Rule 18. The project design shall demonstrate an ability, such as by securing a bond, to fund the project through to completion.

Rule 19. The project design shall include a contingency plan that will ensure conservation of underwater cultural heritage and supporting documentation in the event of any interruption of anticipated funding.

VI. Project duration – timetable

Rule 20. An adequate timetable shall be developed to assure in advance of any activity directed at underwater cultural heritage the completion of all stages of the project design, including conservation, documentation and curation of recovered underwater cultural heritage, as well as report preparation and dissemination.

Rule 21. The project design shall include a contingency plan that will ensure conservation of underwater cultural heritage and supporting documentation in the event of any interruption or

termination of the project.

VII. Competence and qualifications

Rule 22. Activities directed at underwater cultural heritage shall only be undertaken under the direction and control of, and in the regular presence of, a qualified underwater archaeologist with scientific competence appropriate to the project.

Rule 23. All persons on the project team shall be qualified and have demonstrated competence appropriate to their roles in the project.

VIII. Conservation and site management

Rule 24. The conservation programme shall provide for the treatment of the archaeological remains during the activities directed at underwater cultural heritage, during transit and in the long term. Conservation shall be carried out in accordance with current professional standards.

Rule 25. The site management programme shall provide for the protection and management in situ of underwater cultural heritage, in the course of and upon termination of fieldwork. The programme shall include public information, reasonable provision for site stabilization, monitoring, and protection against interference.

IX. Documentation

Rule 26. The documentation programme shall set out thorough documentation including a progress report of activities directed at underwater cultural heritage, in accordance with current professional standards of archaeological documentation.

Rule 27. Documentation shall include, at a minimum, a comprehensive record of the site, including the provenance of underwater cultural heritage moved or removed in the course of the activities directed at underwater cultural heritage, field notes, plans, drawings, sections, and photographs or recording in other media.

X. Safety

Rule 28. A safety policy shall be prepared that is adequate to ensure the safety and health of the project team and third parties and that is in conformity with any applicable statutory and professional requirements.

XI. Environment

Rule 29. An environmental policy shall be prepared that is adequate to ensure that the seabed and marine life are not unduly disturbed.

XII. Reporting

Rule 31. Reports shall include:

- (a) an account of the objectives;
- (b) an account of the methods and techniques employed;
- (c) an account of the results achieved;

- (d) basic graphic and photographic documentation on all phases of the activity;
- (e) recommendations concerning conservation and curation of the site and of any underwater cultural heritage removed; and
- (f) recommendations for future activities.

XIII. Curation of project archives

Rule 32. Arrangements for curation of the project archives shall be agreed to before any activity commences, and shall be set out in the project design.

Rule 33. The project archives, including any underwater cultural heritage removed and a copy of all supporting documentation shall, as far as possible, be kept together and intact as a collection in a manner that is available for professional and public access as well as for the curation of the archives. This should be done as rapidly as possible and in any case not later than ten years from the completion of the project, in so far as may be compatible with conservation of the underwater cultural heritage.

Rule 34. The project archives shall be managed according to international professional standards, and subject to the authorization of the competent authorities.
